

bulletin board[®]

forbo bulletin board solutions

Forbo Bulletin Board is the choice for schools, healthcare facilities, offices and other environments where a functional, washable, tackable surface is needed. It is applicable as a decorative finish for furniture, doors, community boards, framed boards, wall, and other applications. Forbo Bulletin Board is extremely durable, has a low level of light reflectance, and will not warp or crumble.

durable

A natural tackable surface with an unsurpassed durability that stands up to the roughness of repeated school and industrial use, year after year.

permanent bacteriostatic properties

Bulletin Board is easy to clean and has bacteriostatic properties.

palette of attractive colors

Available in a broad range of solid-through colors to complement any interior or decor.

LEED® credit compliance

Bulletin Board is made from 87% rapidly renewable ingredients and contains 41.5% post industrial recycled content. This and other product characteristics contribute to credits under the U.S. Green Building Council's LEED® rating systems.

a natural, healthy, environmentally sustainable product

Bulletin Board is made from natural ingredients: linseed oil, granulated cork, and pine rosin binders calendered on a jute backing. It emits no harmful emissions (V.O.C.'s) or carcinogens.
